

Robotex Cyprus 2019

Following the huge success of the previous events, the Cyprus Computer Society (CCS) is organizing the 3rd Robotex National Robotics Competition, which will take place on June 29-30 at the University of Cyprus. The Robotex Cyprus 2019 is under the auspices of H.E. President of the Republic of Cyprus Mr Nicos Anastasiades. With the University of Cyprus and the Youth Board of Cyprus as co-organizers Robotex Cyprus is coming back for the third consecutive year with new challenges, competitions and robotic platforms. It is expected that the number of participation in teams, players and robots will exceed every expectation.

Robotex Cyprus 19 is organised on the basis of the regulations of the respective International competition and is addressed to students of all ages (elementary, high school, university), soldiers and adults interested in robotic technology. Admission is free of charge and the prize for the winning teams will be, amongst others, their right to participate in the Robotex International Competition in Estonia. Robotex Challenges, such as the SUMO and MAZE Solving as well as the educational robotics exhibition from primary school children, are expected to attract not only the young competitors but also their friends and families who will attend to support them.
